

Hey! Thanks for watching the video, hope you loved it ☺

“newworld.zip” is the oldest Minecraft server world, and it’s probably what you’re here for. Here’s how you can play it:

1. Download the “newworld.zip” file.
2. Download a launcher that can play Minecraft Alpha 1.0.16. I recommend Betacraft or Prism, which are both free and easy to set up.
3. Make a new instance in that launcher for Minecraft Alpha 1.0.16. In Betacraft, click on “Instances” at the top, click “Add Instance”, search for “a1.0.16”, select it, and click Create. In Prism, click “Add Instance” in the top left, check “Alphas” under the version filter on the right, search for “a1.0.16”, select it, and click “OK”.
4. Select your new Alpha 1.0.16 instance and press Play, then close Minecraft.
5. Find “newworld.zip” in your downloads and extract the file to a folder on your computer.
6. Copy that folder to wherever your Minecraft worlds are stored. For Betacraft, that’ll be “C:\Program Files\Betacraft\betacraft\instances\Alpha 1.0.16\.minecraft\saves”. For Prism, that’ll be C:\Users\YOUR_NAME_HERE\AppData\Roaming\PrismLauncher\instances\Alpha 1.0.16\.minecraft\saves. Replace “Alpha 1.0.16” with whatever you called your instance, if you gave it a different name.
7. Open Minecraft Alpha 1.0.16 and play the map of Minecraft’s oldest server!

That’s pretty complicated if you’ve never done it before, so I ported Maxloader SMP’s first world to Minecraft 1.21.4 (it took forever). Here’s how to play that:

1. Download the “newworld - 1.21 Port.zip” file.
2. Find “newworld.zip” in your downloads and extract the file to a folder on your computer.
3. Copy that folder to wherever your Minecraft worlds are stored. Usually, that’s “C:\Users\YOUR_NAME_HERE\AppData\Roaming\.minecraft\saves”.
4. Open Minecraft 1.21.4 and play the map of Minecraft’s oldest server!

Here’s some cool spots I found on the first Maxloader world that you can visit. Tell me if you find any more!

- 79 63 -133 - Small hillside house
- 140 67 -154 - Tiny base with wheat farm
- 316 74 -76 - Mini castle
- 221 96 7 - The “Maxloader empire” - abandoned castle, pyramid, airship, mountain home, and more
- 54 71 104 - World art saying "1up :)"
- 45 70 61 - Tiny stone cave base
- 17 79 -58 - Small terraformed mountain
- 377 73 -30 - Some sort of cross?

- 124 96 -531 - Example of glitched terrain
- 31 78 -438 - Example of glitched alpha trees

If you're interested in the other Maxloader worlds I didn't show off in this video, you can find them all in the "Other Worlds" folder. I haven't ported these to 1.21.4 and won't be writing new instructions for all of them, but basically, extract them to a folder, put them with your other Minecraft saves, and open a Minecraft version from around the time they were saved.
